Micron Filtration System

Water is filtered through screens with microscopic holes. the smaller the filter holes, the more contaminants the filter can remove. Good filters can remove most chemical contaminants and microbes. Filter holes are measured in microns. When considering filter size, look for an absolute (the largest hole), or minimal (the average hole) rating. An absolute one micron filter is needed to remove *Cryptosporidium*.

Pumps

monoblock pump

- CRI
- Kirloskar

dosing pump

- UKL
- Razpro

high pressure pumps

- CRI
- Grundfos
- CNP

Water Treatment Plant Components & Maintenance

Products for STP ETP Plants

Coarse Bubble Disc Membrane Diffusers
Coarse Bubble Tube Diffusers
Fine Bubble Disc Membrane Diffusers
Fine Bubble Tube Membrane Diffusers
Fine Bubble Board Membrane Diffusers
Fine Bubble Plate Membrane Diffusers
Fine Bubble Vertical Membrane Diffusers

Bio-Filter Media
Bio-Rex Media
Bio-Fill Media
Bio-Cling Media
Bio-Roto Media

Tube Set Media-Chevron
Tube Set Media-Hexagonal
Tube Set Media-Square

Plate Filter Press
Plate & Frame
Recess Chamber
Membrane Plate

Filter Press in various sizes :

305mm x 305mm	355mm x 355mm
470mm x 470mm	610mm x 610mm
760mm x 960mm	800mm x 800mm
915mm x 915mm	1000mm x 1000mm
1200mm x 1200mm	1500mm x 1500mm

OILSKIMMERS
